Crushing, Screening, and Conveying Technical Committee CSCTC
Former Portable & Stationary Crushing, Vibrating Screen Manufacturers Bureau PSC/VSM

Unapproved Minutes
Four Points by Sheraton, O’Hare Conference Ctr Hotel, Schiller Park IL
Weds, October 10, 2018  8:00a to approx 11:30a (approx)

Presiding:  Tom Cole (Eagle Crusher), Chair

Call to Order and Introductions
The meeting was called to order at 8:00am by Chair Tom Cole.  AEM’s antitrust policy summary was provided and reviewed as a reminder for attendees.  Self-introductions were made by those present.

Member Sign-In and Roster Review
A Sign-In Sheet and Rosters for review were passed.  The following were in attendance:

<table>
<thead>
<tr>
<th>Name</th>
<th>Company/Role</th>
<th>Location</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tom Cole</td>
<td>Eagle Crusher Co</td>
<td>Galion OH</td>
</tr>
<tr>
<td>Matt Brinkman *</td>
<td>Screen Machine Ind.</td>
<td>Etna OH</td>
</tr>
<tr>
<td>Mukesh Patel (Guest)</td>
<td>Multiquip</td>
<td>Boise ID</td>
</tr>
<tr>
<td>Steve Howard</td>
<td>Wirtgen America</td>
<td>Nashville TN</td>
</tr>
<tr>

<td>AEM Tech &amp; Safety Svcs</td>
<td>Milwaukee WI</td>
</tr>
<tr>
<td>Nate Burton</td>
<td>AEM Tech &amp; Safety Svcs</td>
<td>Milwaukee WI</td>
</tr>
</tbody>
</table>

* WebEx / Teleconference

Three of six member firms were present (50%) at the meeting.

Approval of Previous Meeting Minutes
The CSCTC minutes of the March 06, 2018 meeting had been distributed to the group members before the meeting and now were displayed on screen.  The minutes were accepted as submitted by voice vote.

Association Report
OSHA & MSHA Emphasis items, and recent attention MSHA has given to proximity sensors and conveyor fatalities.
AEM’s two technical product seminars on Product Safety & Compliance (PSCS), and Product Liability (PLS) in Spring 2019 were reviewed, and the industry helping industry nature of the PSCS.

John Wagner of AEM was recommended as a source of information and assistance on regulated substances rules, and California Proposition 65 (carcinogens and mutagens), and other regulations.

**Old Business**

The idea of a list of standards pertaining to group products was brought up and attendees would like to move forward, seeing that it would be a useful resource. AEM will send the CPMTC list that is being updated as an example of such a list.

The group was interested in seeing Bernie Bernhard’s documents on respirable crystalline silica as an example of a best practice document. AEM will circulate after the meeting.

Jaime Vos of AEM Safety Materials asked if the crusher Op SM might be combined with the vibrating screen Op SM. The attendees were unsure if that idea is good or not, but it might have merit. The topic should be revisited again as work progresses.

The list of reviewers has these volunteers. Others are welcome.
- Matt Brinkman, Screen Machine Indus
- Tom Cole, Eagle Crusher
- Georg Piller, Wirtgen (Germany)
- Walter Schoch, Wirtgen (Germany)
- Albert VanMullern, Telsmith (Astec)

The best practice document addressing “Clearing a Blocked Crusher” is still on the group’s to-do list.

**China’s engine related regulations** – the group would like to be kept aware of the engine emission, GPS location, and other regulatory requirements being implemented.

The AEM Fall Product Group meetings were described to the group, including the value of its “anchor” CE Standards and Regulations Cmte meeting. Meeting in conjunction with this group of meetings is another option for future CSCTC meetings.

**Other items** touched on in Old Business:
- WorkSafeBC plans to propose a Respirable Crystalline Silica Rule
- F-Gas, ie refrigerant gases in the hydrofluorocarbon category, and the situation with the replacement for R-134A called YF-1234 (aka “YF”). AEM is working to get YF approved for off-road use (the process is known as “SNAP” application).
- Standards work in process within the Building & Roadbuilding Standards Technical Cmte known as TC195, and the US (North American really) TAG-Technical Advisory Group known as TC195 US TAG. The TAG met Oct 9, before the day before this meeting.
- ISO NP 20500, Mobile road construction machinery - Safety (WG9), Paris WG9 – dust extraction, guarding, mills. Visibility.
- ISO/FDIS 21873-2 Mobile crushers - Safety requirements (US to lead this project) – WG8

**Standards Work – update on work**

**Election** None due. Next regular election should be Fall 2019, Chair and Vice-Chair.

**Next Meeting**

The attendees agreed to next meet near the CPMTC group meeting at the World of Asphalt Show in Indianapolis IN, at 7:30am on Tues morning Feb 12, 2019.

**Adjournment**

Meeting adjourned approximately 11:03am.
