

# RECLAIMING THE U.S. INFRASTRUCTURE ADVANTAGE

The United States once had an infrastructure system that was the envy of the world. Years of chronic underinvestment has resulted in crumbling roads and bridges, inadequate waterways, outdated underground pipes and other critical infrastructure needs. It is time for the United States to reclaim its *Infrastructure Advantage*.

## AEM & INFRASTRUCTURE

AEM is the international trade association dedicated to advancing off-road equipment manufacturing. We are users of infrastructure, but we also make the equipment that builds it. Our members include:
